• Task Title: Designed

• Task Description:

Task One: Responsive Company Member Team Page

Project Overview:

Your first project task is to develop a responsive web page for the Company Member Team

Page. The design reference is provided in the attached file named "designed-1." Utilize HTML

and CSS to bring this design to life, ensuring responsiveness across various devices.

• Development Tools: Use HTML and CSS for the implementation.

• Steps Taken:6 steps

• Challenges Faced: Image not loading

   • Solutions Implemented: We can use various types of images inserted like img tags for Using a background image for a <div> element: This is useful when you want to

set a background image for a section of your webpage, such as a header or a hero section. You can control the size, position, and other properties of the background image using CSS.

- Using a background image for a profile picture: Instead of directly embedding the image with the <img> tag, you can use a <div> element with a specific size and shape (e.g., a circle for a profile picture) and set the image as its background. This gives you more control over the appearance of the image, such as adding border-radius for rounded corners.

• Learnings: Both methods offer advantages depending on your specific requirements and design preferences. It's common in web development to use a combination of different techniques to achieve the desired layout and visual effects.
